HR

Otok Pag često se povezuje s Mjesečevom površinom. Ruta koja nudi područja gdje prevladava isključivo kamen kao prepoznatljiv motiv otoka te prijelaz u Kolanjsko polje kao jedino plodno mjesto na otoku, izrazito je dojmljiva. Vožnja uz solanu i bazene soli zaokružuje ovu stazu u turistički vrlo zanimljivu cjelinu. Staza je prvenstveno namijenjena MTB i trekking vozačima umjerene tjelesne i tehničke pripremljenosti no zbog svoje raznolikosti preporučili bismo je svima.

EN

The island of Pag is very often compared to the surface of the Moon. This impressive trail mostly goes through the typical rocky terrain, but also crosses into the Kolanjsko polje, the only fertile area on the island. A ride along the saltworks and salt pools makes it very interesting from the tourist point of view as well. The trail is intended for MTB and trekking riders in moderate physical and technical condition, but because of its diversity, we would recommend it to everyone.

HR

Iako se dužinom ne čini pretjerano zahtjevnom, ovu stazu preporučujemo MTB vozačima umjerene tjelesne i tehničke pripremljenosti. Vožnja u neposrednoj blizini Paške solane i bazena soli u prvom, položenom dijelu staze te vjetrovače i pogled na Velebit u drugom dijelu, čine ovu vožnju uistinu zanimljivom. Dodajmo kako je ruta izložena suncu u cijelosti te je potrebno ponijeti dovoljno vode.

EN

Although not very long and demanding, this trail is recommended for MTB riders in moderate physical and technical condition. It starts with a flat part near Pag saltworks and salt pools and continues with windmills and the view of the whole Velebit mountain, which makes it very interesting. Make sure to bring enough liquids because the trail is mostly in the sun.
